## Summary

---

Dedicated Informatics Engineering student with a strong focus on Blue Team operations, Incident Response, and Digital Forensic. Proven track record during internship at PT Analisis Keamanan Siber, achieving exceptional scores (up to 98/100) in Incident Response and Threat Modelling. Experienced in cloud security assessment, risk mitigation, and SIEM management using Wazuh. Eager to leverage technical expertise and analytical skills in a Security Analyst or IT Governance role.

---

### *Novo Club Batch 4 By Paragon*

*Mar 2026 — Present*

#### **Novo Ranger - Digital Class Special Role**

- **Aligned** team initiatives with organizational strategic goals by using analytical thinking to evaluate project metrics and outcomes.
- **Fostered** collaboration within the Digital Class by serving as a central liaison to coordinate mentors, facilitators, and participants.
- **Balanced** strict timelines and operational efficiency by applying structured project management and analytical thinking to class workflows.

### *PT Analisis Keamanan Siber, Yogyakarta*

*Aug 2025 — Dec 2025*

#### **Internship Junior Security Engineer**

- **Assisted** in configuring threat detection systems (Wazuh) to automate alert responses and reduce manual monitoring efforts.
- Conducted log analysis, vulnerability scanning, and network monitoring to identify potential security risks.
- **Assisted** in risk analysis and documentation processes aligning with **ISO/IEC 27001** frameworks, supporting the GRC team in maintaining security compliance.

### *AIESEC Future Leader, Jakarta*

*Dec 2024 — Feb 2025*

#### **Delegate**

- **Participated** in leadership, communication, and project management training through AIESEC's Future Leader Program.
- **Collaborated** with cross-functional teams to design social impact and youth development projects.
- **Developed** strong teamwork, adaptability, and problem-solving skills through real-world organizational simulations.

## Project

---

### **Key Projects Wazuh SIEM Implementation & Threat Detection Simulation**

- Configured and deployed Wazuh Agents within a virtualized environment to analyze attack patterns.
- Simulated active threat scenarios, including SSH Brute Force attacks, and successfully automated alert responses.

## Education

---

Informatics Engineering, Tangerang | 2024 — Present

University of Muhammadiyah Tangerang

- Currently focusing on computer networking, cybersecurity fundamentals, and system analysis.
- Gaining practical experience in network configuration, ethical hacking, and data protection practices.
- Simulated Wazuh Agent on Virtual Machine to detect SSH Brute Force attacks, Linux administration, and database optimization.

## Skills

---

- **Hard Skills:** Network Security, Vulnerability Assessment, Log Analysis, ISO 27001.
- **Tools:** Wazuh, Wireshark, Nmap, Linux (Ubuntu/Kali).
- **Soft Skills:** Analytical Thinking, Problem Solving.
